The FCC may not conduct or sponsor a collection of information unless it displays a currently valid Office of Management and Budget (OMB) control number. No person shall be subject to any penalty for failing to comply with a collection of information subject to the PRA that does not display a valid OMB control number.

Needs and Uses: The information collection requirements contained in 47 CFR 73.3550 provide that all requests for new or modified call signs be made via the on-line call sign reservation and authorization.

The Commission uses an on-line system, FCC Form 380, for the electronic preparation and submission of requests for the reservation and authorization of new and modified call signs. Access to the call sign reservation and authorization system is made by broadcast licensees and permittees, or by persons acting on their behalf, via the internet's World Wide Web. This on-line, electronic call sign system enables users to determine the availability and licensing status of call signs; to request an initial, or change an existing, call sign; and to determine and submit more easily the appropriate fee, if any. Because all elements necessary to make a valid call sign reservation are encompassed within the on-line system, this system prevents users from filing defective or incomplete call sign requests. The electronic system also provides greater certitude, as a selected call sign is effectively reserved as soon as the user has submitted its call

sign request. This electronic call sign reservation and authorization system has significantly improved service to all radio and television broadcast station licensees and permittees.

Federal Communications Commission.
